Better ways to cut your panels - from Holzma

A huge range of new options, innovations and models are now available from Holzma. Beamsaws that are now faster, smarter and more versatile than ever.

Here's just a few of the many new advantages that reinforce Holzma as undisputed market leader

NEW MODEL

The new HPP250. Cutting cycle times now seriously faster with new drive systems and control software. Big performance for an 'entry level' investment.

POWER CONCEPT'

40% faster cycle times with twin independent grippers and clever software.

DELICATE PANEL SURFACES.

New solutions to avoid scratching of today's high gloss and delicate surfaces.

THE ULTIMATE

Cast one piece base! Just one of the innovations that put the new '5 series' so far ahead. These saws are packed with clever design to deliver huge performance advantages with cut heights to 170mm.

New CADmatic control Practive & Professional. High level control and feedback at your fingertips.

What makes a Weeke Nesting machine so much better?

A better nester comes with dedicated 'from the ground up' design and clever ideas, combined with the best German engineering and real attention to detail. And that's exactly what every Weeke 'Nester' delivers - in spades! Here's just a few examples - but wherever you look on a Weeke you see these and more. Great machines at surprisingly affordable prices.

Better support and balance

Strong 'gantry' design with internal struts for precision without vibration

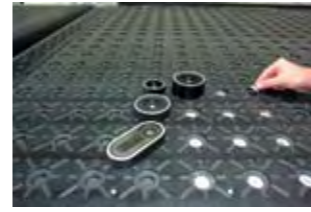

Twin 'Z' axis . Better balanced, less tool changes.

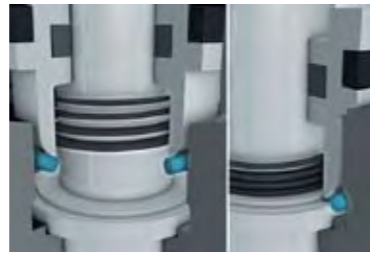

Sealed guide ways eliminate dust build-up.

Increased versatility

Versatile table systems. Nesting and a whole lot more. 'C' (4th axis) options too!

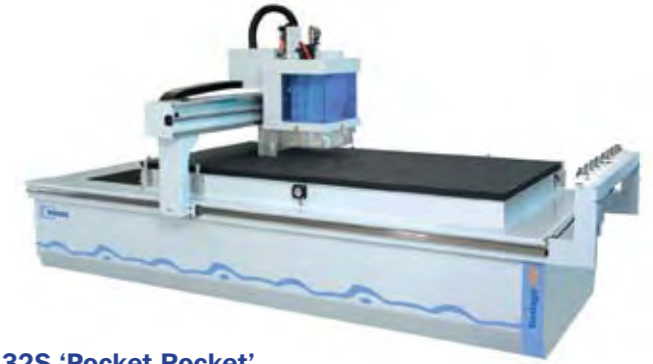

Superior routing and drilling technology

Powerful Routers and patented drill depth locking. Fully variable drill speeds and ability to run up to 35mm diameter drills. Huge versatility others can't match

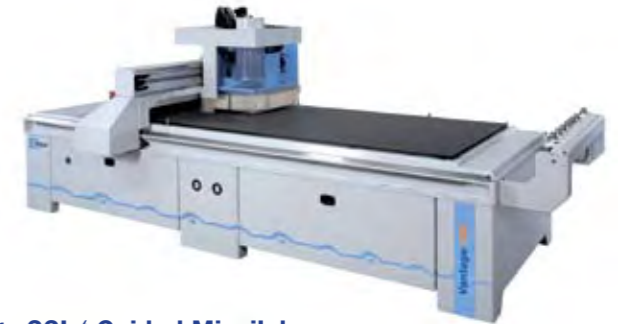

Faster tool change systems with safe auto loading, tool position monitoring and the most rigid 'HSK' tool system

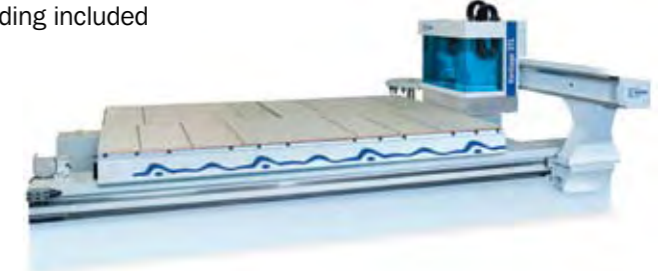

Vantage 32S 'Pocket Rocket'

Compact 2400 x 1200mm with 8 tools and 80m/min speeds

Vantage 33L ' Guided Missile'

3600 x 1200mm with 14 tools and 96m/min speeds. Auto unloading included

Vantage 37L ' Mr. Versatile'

3600 x 1800mm with 14 tools 'C' Axis and 105m/min speeds. Auto unloading and zoning of table vac to suit all common sheet sizes. Also available as a 'workcell' with or without auto labelling at in feed or 'just in time' labels at out feed

The smartest software, data communications and material handling

Efficient auto load and unload options, complete software packages, fibre optic data communications, smart ideas like 'just in time' label production at out feed

Safety and quality components 'built in'

Safety fences and light barriers or pressure mats. Stop retraction monitoring, sealed electrical cable tows, power 'spike' protection. Real safety - something you can't ignore. Plus Quality components everywhere - e.g. German Becker vacuum pumps

Perfect edges at 20m/min - even when corner rounding

'ProfiLINE' series are Brandt's fully automated high specification models for companies who demand the absolute best. The '770' is the top of the ProfiLINE range with legendary 'Made in Germany' engineering and unmatched results. And all for a very reasonable price.

Feed speed is programmed between 8-20m/min and combines with Brandt's 'intelligent panel gap' system to give you maximum throughput without fuss. Its also your entry into the Edge banding Technology from 'Homag' like the 4 motor corner rounder - full program control, magic results - all at 20m/min.

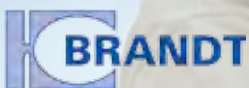

Diamond 'on board corner rounding' Patented 'dust flow control' trimmer tools for significantly cleaner machining, unique trimmer knife design, 3 separate cutting areas, no wear spots. Twin sets of trimmers with full CNC setting. No need to lift hoods - just recall a program and 'go'

The list goes on, wherever you look you see real innovation with real advantages for you - but why not check it out for yourself?. The 770 ProfiLINE is in Homag showrooms now.

High resolution, large 300mm colour flat screen.
Each operating group has its own 'touch button' bringing it to the screen. Quickly create programs and check and change any setting.
Easy 'icon' and graphics driven navigation and set-up.
Production data & clear 'help' functions
EASY!
