Making more of your edges

Homag's KAL210 delivers big savings with end trimming allowance reduced to 2mm or less thanks to high tech Servo edge feed control, exclusive to Homag. Savings of around 20,000 lineal metres of tape per year are enjoyed by the typical KAL210 owner.

A continuous V belt ensures small part feed problems and slippage of panels in the feed are both a thing of the past. With feed speeds up to 32m/min and programmed changeovers getting the days work through easily is a cinch.

The '4 motor layout' allows full programming of corner rounding – tops only, bottoms only front or rear of panel or both – its now your choice, not a machine limitation. Everything is controlled with 100% precision 'high interaction' PC22 controller. Clear and intuitive programmed setting is child's play while the operator receives up to the second feed back on production output and settings.

In fact wherever you look on these new Homag Edger's you will see the latest Edge banding technology hard at work to save you money while improving edge banding quality.

A small example : in the unlikely event of a feed track stop – the glue roller lifts away from the panel so there's no wasted part or costly remake.

This is clever technology, proven in Europe and available now from Homag - at a very special price from now through to June 30th (current stocks only) And don't forget the 30% tax rebate savings too!

"I wish I had purchased a Homag Edgebander years ago"

Franz Braun – Furniture Concepts.

"Our KAL has met all our expectations. With our Homag Group automated in feed and panel return system we achieve high speed of production without compromising the quality"

Barry Wyatt – OFD

HOMAG SERVICE

Still standing by our Customers...

Homag Service is still 'on the front foot' despite the current tough conditions.

Because Homag understand the importance to you of good service.

No matter what market conditions are you need our first rate backup and our support.

Unlike many others in our industry...

We have not reduced our service capacity

We still undertake regular in-house training of service techs, our sales team and your operators.

Our co-ordinators are 'state-based', you deal with a local

Our techs are trained in Germany with regular updates and support from German technicians.

Homag Service - standing beside our customers through thick and thin

Edger Glue Tanks

now 'swap and go'

We can now quickly and efficiently service your glue tank or even faster - swap it for an already serviced tank.

Fast, efficient and cost effective.
